

rotor section concentrically carried on the rotary shaft for rotation relative to the stator
section.

Please amend claim 14, at line 3 by deleting "a plurality of" and replacing with --one
or more--.

REMARKS

The present amendment is partly in response to the Notice of Omitted Items (copy attached for the convenience of the examiner). The Notice indicates that FIG. 16 discussed in the specification was not included with the application as filed. FIG. 16 was not filed nor intended to be filed with the application. Therefore, this preliminary amendment deletes all reference to a FIG. 16 as permitted under option III in the Notice. By filing this preliminary amendment, the applicant constructively accepts the application as deposited in the PTO. By accepting option III of the Notice, the applicant does not submit a petition under either of options I or II.

This preliminary amendment also corrects several informalities noted during a review of the application. Portions of the text have been corrected to more clearly correspond with what is shown in the drawing Figures 1-15 as filed.

No new matter has been entered by this preliminary amendment. All changes are supported within the specification, claims, and/or drawing figures as originally filed. The applicant awaits early and favorable consideration and examination of the application in due course.

Respectfully submitted,

MARSHALL, O'TOOLE, GERSTEIN,
MURRAY & BORUN
